CUTLINE--

PREHISTORIC TOOLS-- Dr. Fred Munday holds pieces of flint worked by Neanderthal man 60,000 to 80,000 years ago. Slivers of flint, like the one at right, were chipped from larger pieces and turned into tools, such as scrapers or spear points. Tools made by fully modern man, on the other hand, were more elongated and made more efficient use of the cutting edge. (UM photo by Virginia Vickers Braun)
